

Test task React

APPLICATION

Please create a simple **list application**.

- See picture for details.
- Style must be similar to the picture.
- **We are looking for good structure of the app. Nice code that is easily readable, understandable and well-structured.**
- In case you have any questions please ask.

STACK

Please use:

- Webpack (or some other build tool)
- Sass (or other framework) for CSS
- Optional: you can use starter kit (e.g. create-react-app) but let us know why you chose it / like it

LEVELS

Here are several levels that cover increasing knowledge. The goal is to create something that will allow us to create a picture about your skills. Feel free to go as far as you feel comfortable.

LEVEL 1 - STATIC

Create static representation. No need for buttons to work. This is beginner's level.

LEVEL 2 - REDUX + USER ACTIONS

Add Redux store and make the app work.

- save all items in Redux store.
- save activation state in Redux store.

LEVEL 3 - CONFIRMATION DIALOG

Show confirmation dialog before deleting.

LEVEL 4 - ASYNC

Add async Redux actions - as if you were calling API to get / update data. But just mock the returned data.

LEVEL 5 - TESTS

Please also add 2 tests:

- one for reducer
- one for checking that correct HTML (part of it) is generated for any of component you have created

Choose any test stack you like.
